EDUCATION

NBKR Institute of Science and Technology, Nellore **Aug 2025 – Present**
Bachelor of Technology in Computer Science Engineering

Geethanjali Institute of Science and Technology **Aug 2022 – May 2025**
Diploma in Computer Science Engineering **85.1%**

DNR ZP Boys High School **Mar 2021 – May 2022**
SSC, Class X **76%**

EXPERIENCE

TVS Sundram Fasteners Ltd., Sri City, Andhra Pradesh **Nov 18, 2024 – May 18, 2025**
Industrial Trainee – Production / CNC Machining

- Completed six months of hands-on industrial training focused on production processes and CNC machining operations.
- Worked directly with CNC and DMC machinery, gaining practical exposure to manufacturing workflows and operational safety standards.
- Utilized precision measuring instruments including vernier calipers and micrometers for strict dimensional inspection and quality-control.
- Gained foundational exposure to SAP ERP systems within a high-volume manufacturing environment.

TECHNICAL SKILLS

- **Languages:** C++, Python, Java
- **Web & Database:** Web Development, Database Integration, MySQL, HTML, CSS, JavaScript
- **Frameworks & AI:** Gemini AI API, Anti-gravity Framework
- **Core Concepts:** Programming Fundamentals, Object-Oriented Programming (OOP), Data Structures
- **Tools & Systems:** SAP ERP, CNC/DMC Machines, Git, GitHub

PROJECTS

Internet Banking System – Web Application

- Designed and developed a secure, responsive web application for managing core online banking operations.
- Implemented user authentication workflows including login, sign-up, and secure session management.
- Built core modules for real-time balance enquiries, fund transfers between accounts, and detailed transaction histories.
- Structured database schemas using MySQL to support reliable transactional execution and persistent data storage.

AI Learning Path Generator – Web Application

- Developed an intelligent educational platform using Anti-gravity and the Gemini AI API.
- Implemented dynamic evaluation logic that analyzes a student's proficiency level and generates personalized learning paths.
- Built automated topic recommendations and progress tracking modules backed by a MySQL relational database.
- Integrated AI model endpoints to deliver real-time adaptivity and continuous learning path updates.

ADDITIONAL

- **Software Dev:** Web application design, AI integration, and database systems.
- **Industrial Exposure:** CNC/DMC machining operations, precision measurement, and SAP ERP.
- **Practices:** Git-based version control, database schema design, modular programming, and procedural optimization.
